TSA CARGO SECURITY SCREENING AUTHORIZATION

To Our valued customers:

As of February 1, 2009, the Transportation and Security Administration will be instituting revisions and enhancements to the required security programs of the Indirect Air Carriers (Logistics providers like ourselves) and the Air Carriers. A major portion of the new security procedures is involved with Cargo Screening. The TSA must have your authorization to screen cargo and JSI must have a copy of this authorization to tender cargo for transport on passenger aircraft. The Authorization must be given by your company on your company letterhead. Please copy and paste the section below to your letterhead. Replace and or delete text where appropriate then complete and sign it and return it to us via email or fax. JSI will work with carriers and when possible utilize carriers that use non-invasive screening technologies but non-invasive technologies may not always be available and /or used by the air carriers.

For those of you shipping any electronics in Anti static barrier bags or containers – you will be exempt from physical screening beyond your anti static barrier but your shipment must be accompanied by the information contained on the attached form. You can either use the attached form or create a similar form on your own invoices, packing lists or letterhead that will accompany the shipment. This is not mandatory but is useful to avoid possible damage resulting from breaching of your antistatic barrier. Please do not hesitate to contact your local rep or myself if you should have any questions.

Thank you and best regards
